

BioBlitz 2018 at the Dixon Waterfowl Refuge

Final Plant List

BOLD = species new to the site

NOTE: A plant's C-VALUE (or degree of conservation) describes its relative rarity, and the probability of finding it in an undisturbed environment, as defined in *Plants of the Chicago Region* (1994, Floyd & Swink), and later *Flora of the Chicago Region* (2017, Wilhelm & Rericha).

Many thanks to the volunteers, citizen and scientist alike, who helped make this list possible – especially our heroes from iNaturalist. Visit our iNaturalist collection: (<https://www.inaturalist.org/projects/dixon-waterfowl-refuge-bioblitz-2018>)
